

## The Amersham Pensioners' Association Website – Members Only Area

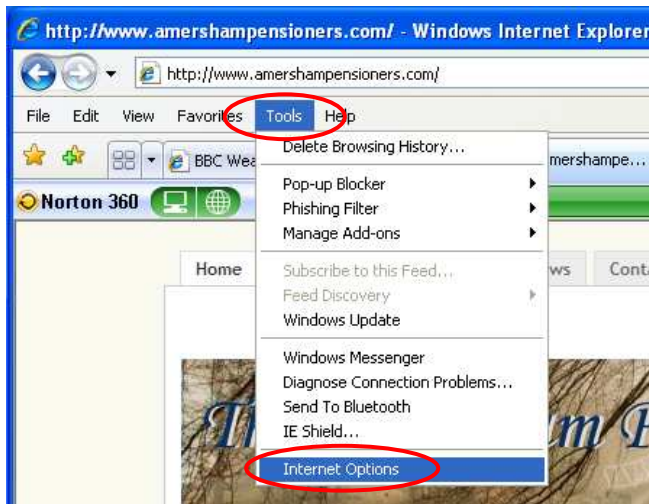

In order to be able to access the Members Only area of the TAPA website it is necessary to allow your browser to accept **cookies** from our website.

A **cookie** is a small piece of text, stored on a user's computer by a web browser and in the case of websites which require users to 'log-in' or access a protected area by means of a password, a cookie from the website will allow the server to know that the user is already authenticated, and is therefore allowed to access areas that are restricted to a user who is not logged in.

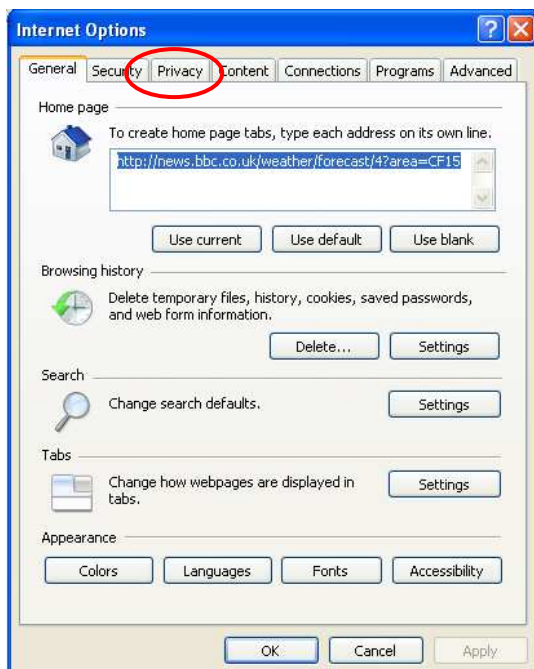

Some web browsers like *Mozilla Firefox* allows cookies for all websites on the standard installation and it is unlikely you will have any problems unless you have changed the default settings since installing, but *Internet Explorer* (which is part of the Windows installation) is initially set up to block them unless you tell it to allow them for specified websites. If you are using *Internet Explorer* to browse the internet, here's what you will need to do - it's not as difficult as it may seem and it will not leave your computer vulnerable to any security problems.

Launch **Internet Explorer** and go to [www.amershampensioners.com](http://www.amershampensioners.com).

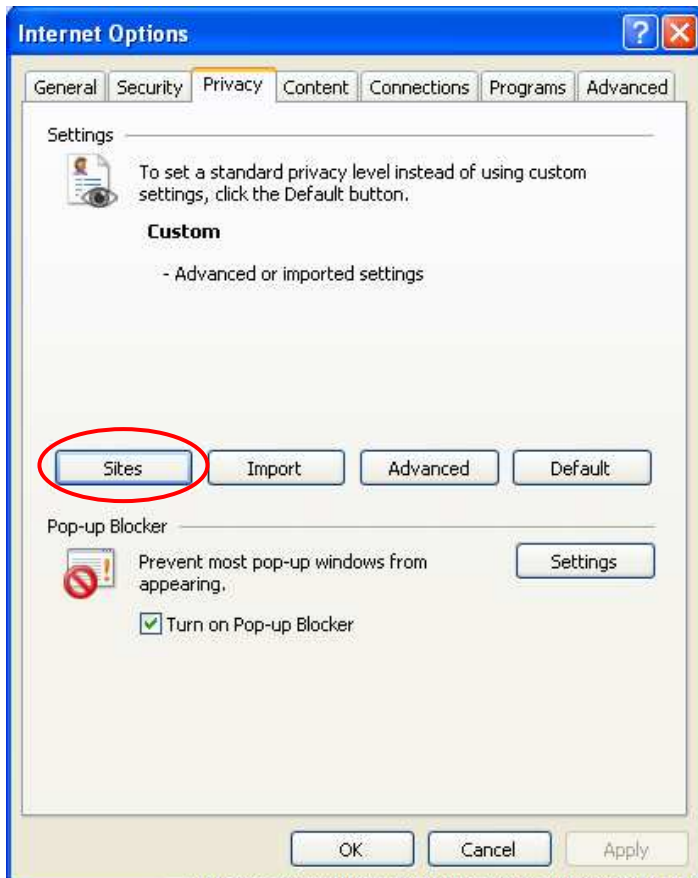

Click on **Tools** and then **Internet Options**

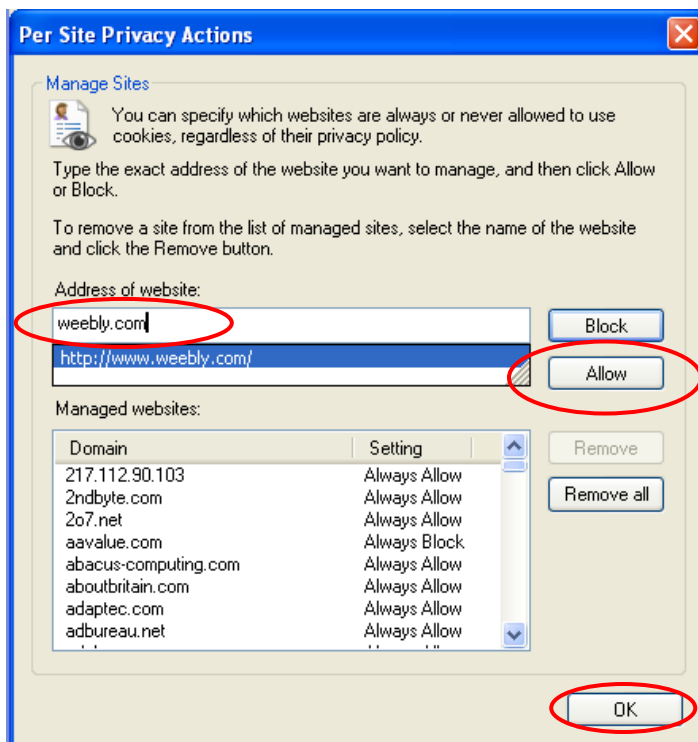

Click on **Privacy**

Click on **Sites**

Type **weebly.com** in the box labelled **Address of website**. Then click on **Allow**. Finally click on **OK**.

You will now be able to access the "Members Only" area of the Website by using the password provided and published in the July Issue of The Amersham Link. If you are using any other web browser and have any problems please contact [Webmaster@amershampensioners.com](mailto:Webmaster@amershampensioners.com)
